Wenzhou-Kean University, DaXue Road 88, Wenzhou, Zhejiang, China, 325000

EDUCATION

Wenzhou-Kean University

Junior Student

Department of Mathematics Science

August 2019 - Present

Overall GPA: 3.771/4.0

Major GPA: 3.873/4.0

SKILLS

Programming skills: Python(proficiency), JAVA, Matlab, R, Maple, Linux, Markdown, Latex

Language: Chinese, English

Framework: Pytorch, Tensorflow, Keras

RESEARCH EXPERIENCE

Real-Time Bidding

Functional Optimization Reinforcement Learning for Real-Time Bidding

Sept 2021 - Dec 2021

Underreview

- Design functional optimization agents (FOAs) using Lagrange multiplier
- Combine the deep reinforcement learning and functional optimization to learn the agent's causality.
- Demonstrate the effectiveness of the functional optimization using the multi-agent bidding scenario.
- **My responsibility:** DQN network, FOAs, paper writing

Image Deraining

Segmentation-Aware Progressive Network for Perceptual Contrastive Image Deraining 2022 WACV Workshop

July 2021-Nov 2021

- Propose a semi-supervised segmentation-aware progressive network.
- Present a novel progressive dilated unit (PDU) embedded with a new channel residual attention (CRA), allowing efficient usage of multi-scale rain streak information.
- Design a new perceptual contrastive loss (PCL). By integrating perceptual and contrastive losses.
- Comprehensive experiments demonstrate that our model surpasses previous **state-of-the-arts**.
- **My responsibility:** Introducing contrastive learning, PCL, comparison with SOTA, paper writing.

Image Deblurring

Deblur-YOLO: Fast Real-Time Object Detection with Blind Motion Deblurring

Dec 2020-Feb 2021

2021 IJCNN(Oral)

- Presents an efficient object detection model robust to motion blur.
- Introduce Dilated Feature Pyramid Network (DFPN), which utilizes dilated convolution blocks to obtain a larger receptive field with less memory consumption.
- Design Smooth Peak Signal-to-Noise Ratio (SPSNR), which utilizes smooth l1 loss and effectively measures restored images' smoothness.
- Our model achieves competitive performance against several **state-of-the-art** image deblurring models on COCO 2014, Set5, and Set14.
- **My responsibility:** Composing, network design

WORKING EXPERIENCE

Wenzhou-Kean University AI-LAB

Computer Vision Github Website

Feb 2022 -

Co-founder

Findability Science

Real Time Optimal Bid Shading for First Price Auction

Sept 2021- Dec 2021

Algorithm Consultant

- Explain more than five advanced algorithm for their team.
- Propose a Deep Q Network(DQN) for first price auction.
- Use Deep learning model DeepFM for CTR prediction.

Newford Research Institute of Advanced Technology

Data analysis of Zhejiang Province Industry

Oct 2020 - Dec 2020

Data Analyst

- Data visualization of Industry in Zhejiang Province.
- Develop a web crawlers script for collecting the data.

AWARD

3rd Price of National Mathematical Contest in Modeling

Reviewer of 36th AAAI

2020-2021 Dean List Scholarship

2020-2021 Research Scholarship

Invited Speaker in Fudan University

ACADEMIC INTEREST

Machine Learning, Computer Vision, Reinforcement learning
